

AFFIDAVIT OF AUTHENTICITY OF DIGITAL EVIDENCE
CASE 113567

The undersigned, **Olga Nagdaseva**, being duly sworn hereby declares and says:

I, **Olga Nagdaseva**, declare that Digital Forensics Corporation (DFC) performed web investigation to determine ByLock mobile application functionality;

I, **Olga Nagdaseva**, declare that Digital Forensics Corporation (DFC) identified all information relevant to ByLock Mobile Application functionality and comparable applications;

I, **Olga Nagdaseva**, declare that The DFC engineers concluded that ByLock application is a commercially encrypted smartphone application with encrypted chat capabilities, and is marketed to consumers as an application that protects user privacy;

I, **Olga Nagdaseva**, declare that The DFC engineers identified comparable mobile applications with features such as similar encryption and self-destroying messages, including Snapchat, Telegram, Signal Private Messenger, and other globally popular applications.

I, **Olga Nagdaseva**, declare that ByLock does not have any distinct features from encrypted messaging applications that would position this application as intended for malicious use.
